## OBJECTIVE

Learn as much about programming and IT work to obtain a job in such fields that simultaneously fits me and whatever team I end up working with

## PREVIOUS EXPERIENCE

### **Event Church Volunteer – Leader**

**Bethlehem Ev. Lutheran Church (Manassas, VA)**

**December 2014 - October 2025**

For over a decade, I've been doing various work around my church during events. Helped in food services; worked at popcorn and snow-cone machines, grilled, set up equipment and tore it down, cleaned. Some were individual tasks; some were as a team. I've worked in my church's AV booth until someone else was able to take my role. Planned various other activities, helped at the front desk (when we have one), and have been the generalized 'on hand' guy; being able to do loads of tasks for anyone if/when needed.

### **Chick-fil-a Employee – Team Member**

**Chick-fil-a (Chantilly, VA)**

**September 2021 - February 2022**

I was hired as a Team Member, which had me primarily doing one of three jobs. Working the cash register and taking our patron's orders up front, or working doing that same at the drive through, or being outside to take orders. I was also instructed on food and drink preparation.

## EDUCATION & TRAINING

### **High School Student**

**Westfield High School (Chantilly, VA)**

**September 2017- June 2021**

Earned an advanced diploma by completing more advanced math, science, history, English, and German classes. Completed 3 programming classes, a year of orchestra, and digital art. Succeeded in both individual and team assignments.

### **Varsity Crew (Rowing) Member/Leader**

**Westfield High School (Chantilly, VA)**

**September 2017- February 2020**

Lettered in varsity crew in my sophomore year. Excelled in enthusiasm, endurance, strength, speed, as well as bonding with the rest of a five- or nine-man team. Couldn't continue with crew due to covid. Worked well in a dynamic, peer-led team.

### **College Student**

**Northern Virginia Community College (Manassas, VA)**

**September 2022- October 2025**

Originally started working towards a CyberSecurity degree, but I realized half-way through that wasn't the field for me, So I've pivoted over to Information System Technology, though still retaining my knowledge from my previous major. During my time I've learned the basics of Java, HTML, virtualization set up, and many other topics and skills

**RELEVANT SKILLS**

Fairly friendly. Dependable. Flexible. Adaptable. Extremely motivated. Determined. Extremely athletic. Independent, yet cooperative. Reliable in stressed out situations.
